

Research Participants Invited!

- ✓ Are you a classically-trained singer?
- ✓ Can you sing with vibrato?
- ✓ Are you between the ages of 18-90 years?

If so, you might qualify to participate in a research study.

The goals of the study are to understand how speakers control their voice and to develop therapy that improves vocal control.

Participants will complete hearing tests, cognitive tests, and voice recordings while they perform different speaking tasks. Nasolaryngoscopy may also be performed.

Participation is limited to two sessions, each lasting no longer than 4 hours. Parking and compensation will be provided.
